

MAJ Boutique — Prototype Development Documentation

Project: MAJ Boutique — Luxury Jewellery Showroom

Document type: Prototype development summary

Repository: [\[github.com/ztajwer/Prototype-MAJ\]](https://github.com/ztajwer/Prototype-MAJ)(<https://github.com/ztajwer/Prototype-MAJ>)

1. Overview

This document outlines the development progression of the MAJ Boutique digital showroom prototype across three major iterations. The objective throughout all versions was to deliver a premium, cinema-inspired jewellery experience that reflects the standards of a luxury maison.

The prototype simulates entering a high-end jewellery environment through structured visuals, controlled motion, and product-focused interaction.

2. Prototype Development Journey

Version 1 — Initial Concept Prototype

The first version established the foundational structure and visual direction of the MAJ experience.

Main objectives

- Define the initial showroom concept
- Test luxury-oriented interface layouts
- Structure jewellery presentation sections
- Evaluate colour palettes and lighting direction

Features implemented

- Basic landing page structure
- Luxury-themed interface framework
- Jewellery showcase sections
- Hero banners and promotional layouts
- Static visual presentation

- Early animation experiments

Design direction

- Dark luxury aesthetics
- Gold and rose-gold accents
- Elegant typography
- Minimal layout with premium spacing

Challenges

- Balancing visual realism with performance
- Creating depth without heavy 3D rendering
- Maintaining responsive behaviour
- Optimizing visual hierarchy

Outcome

Version 1 established the visual identity and overall creative direction of the prototype. It provided the foundation for subsequent interactive and immersive development.

Version 1 — Visual references

Screen	Description
Preloader	Brand introduction and loading state
Door entry	Transition into the showroom environment
Showroom	Primary product presentation layout
Product view	Individual piece viewing interface

Image reference: ./assets/v1/02-door-entry.png

Image reference: ./assets/v1/03-showroom.png

Image reference: ./assets/v1/04-product-view.png

Version 2 — Interactive Showroom Evolution

The second version focused on immersion, motion, spatial depth, and interaction quality.

Main objectives

- Introduce cinematic movement
- Build a more realistic showroom environment
- Improve transitions and scrolling behaviour
- Add depth and spatial presentation

Features implemented

- Enhanced scroll-based animations
- Zoom-in and zoom-out cinematic effects
- Interactive showroom sections
- Improved lighting and surface reflections
- Layered background environments
- Smooth section transitions

UI/UX improvements

- Cleaner layout structure
- Improved spacing and typography balance
- Stronger visual consistency
- Enhanced mobile responsiveness
- Refined luxury branding direction

Technical improvements

- Improved frontend structure
- Organized asset pipeline
- Animation performance optimization
- Responsive scaling across devices

Outcome

Version 2 significantly improved the immersive quality of the experience and moved the prototype closer to a functional luxury showroom presentation.

Version 2 — Demonstration

Screen recording of the interactive showroom (scroll motion, zoom, and transitions):

****Video file:**** `docs/assets/v2/version-2-demo.mp4`

> For PDF distribution, share the video file separately alongside this document. It is included in the project repository under `docs/assets/v2/`.

Final Prototype Version

The final version combines the strongest elements from previous iterations into a polished, production-ready prototype.

Final vision

The final prototype simulates entering a luxury jewellery showroom through:

- Cinematic presentation
- Premium visual atmosphere
- Smooth interactions
- Realistic spatial depth
- Product-focused layout

Final prototype features

****Luxury showroom environment****

- Showroom-inspired interface
- Architectural composition
- Controlled lighting and depth
- Reflective and material-aware styling

****Smooth scrolling experience****

- Fluid page motion
- Controlled animation timing
- Layered depth interactions
- Scroll and touch-based zoom

****User flow****

1. Preloader — brand entry (`pla.avif` backdrop)
2. Welcome video — cinematic introduction
3. Showroom — six-product carousel with auto walk-in and scroll zoom
4. Customize room — product rotation, sizing, and configuration view

****Responsive design****

- Desktop optimization
 - Tablet support
 - Mobile layout with dedicated assets (`mob.png`)
-

3. Technical Stack

The final prototype is built with modern frontend technologies:

Category	Technology
Framework	Next.js 14 (App Router)
Language	TypeScript
UI library	React 18
Styling	Tailwind CSS, custom CSS
Animation	Framer Motion
3D (available)	Three.js
Fonts	Playfair Display, EB Garamond, Didact Gothic
Tooling	ESLint, PostCSS, Autoprefixer
Hosting (recommended)	Vercel

4. Project Deliverables

Deliverable	Location
Source code	github.com/ztajwer/Prototype-MAJ
Prototype documentation (this document)	`docs/PROTOTYPE-JOURNEY.md`
Version 1 screenshots	`docs/assets/v1/`
Version 2 demo video	`docs/assets/v2/version-2-demo.mp4`
Project setup guide	`README.md`

5. Summary

Version	Focus	Result
V1	Visual identity and layout foundation	Established brand direction and showroom structure
V2	Motion, depth, and interaction	Improved immersion and user engagement
Final	Integration and polish	Complete cinematic showroom prototype ready for deployment

The MAJ Boutique prototype delivers a structured luxury digital experience suitable for client presentation, further development, and production deployment.

Document prepared for MAJ Boutique prototype review.
